

Advanced information management tools and elevated support give you anytime, anywhere control of cases and costs and help inform decision making and drive successful outcomes.

ASCENT™

ENTERPRISE LEGAL MANAGEMENT

Legal spend, legal hold, and matter management software improving legal department performance by 65%

ASCENT v8 solves the need for legal teams to change the way they work because their ELM software can't adapt to their work processes. The user interface allows teams to easily customize what they see and how they see it to save time and effort when seeking business insights to make more informed decisions. Client efficiency is enhanced through "smart data, intelligently delivered," which allows legal teams to rethink their data strategy in ways that boost legal performance by up to 65%.

Added capabilities such as enhanced Analytic Dashboards, Outlook Integration, Query & Report Builders, and AFA Creation allow high-performing legal teams to control their cases and costs to make more informed decisions and drive successful outcomes.

New SmartView™ Analytic Dashboards

allow teams to see a complete view of the entire business on one, configurable screen. generate deeper business insights using graphical visualizations to make instant, data-based decisions.

New SmartLink™ Outlook Integration

allows your teams to operate in a more efficient, unified work environment. You stay in Outlook to handle tasks without switching back and forth between systems.

What if your ELM solution delivered business insights the way you needed to make decisions?

Ensure your software experience makes sense to you

Advanced software allows you to solve the problem of having to change the way you work because your software can't change. The completely redesigned user interface lets you navigate more simply, customize what you see and how you see it, enabling you to work smarter, not harder.

Ask complicated questions more easily

You have questions about everything the system captures and you want up-to-the-minute results. The new Query Builder simplifies how you ask these questions and lets you target every piece of information in the system. New features like dynamic filters and user-created calculated fields let you customize your results..

Get answers instantly

You need answers without waiting for someone else to pull a report. The new Report Builder lets you easily create reports by using drag and drop fields. Reports can be scheduled and automatically distributed or made instantly available to everyone using the new SmartView dashboard. You can also output to Excel with a simple mouse click. Combining this with the new Search Page enhancements makes your information even more useful.

See a complete view of your business in one place

Viewing your most critical information in one place, in a way that makes sense to you, is critical. You may be spending hours poring over lengthy reports simply to find the information you need. The new SmartView dashboard provides graphical views of key information at a glance. You can compare matter, spend, and law firm data in one view to make informed decisions.

Create new fee arrangements to predict and control costs

Fee arrangements should not be limited by your software - only by your creativity. You deserve the flexibility to use what makes the most sense for your business. The new Alternative Fee Arrangements (AFA) capability allows you to create and manage new "value-based billing" scenarios, transparently collaborating with outside counsel., putting you in control of vendor billing and fees.

Smart data, intelligently delivered.
