

Advanced information management tools and elevated support give you anytime, anywhere control of cases and costs and help inform decision making and drive successful outcomes.

# ASCENT™

## ENTERPRISE LEGAL MANAGEMENT

Legal spend, legal hold, and matter management software improving legal department performance by 65%

### - ASCENT™ Solution Capabilities -

- **Workflow Automation**

Enhanced workflow provides matter intake, vendor on-boarding, accrual, budgeting & timekeeper submissions/review process tools. Constantly evaluate and adjust the process to remove review bottlenecks, improve process efficiencies, forecast new matter tasks, and adapt to changing requirements.

- **Advanced eBilling**

Electronic invoice vendor submission with preset routing routines allows for high invoice volumes. Automated rules processing includes error identifications, warnings, adjustments, and rejection capabilities. Searches, calculations, validations, and notifications are all included. Custom business system interfaces can be created.

- **Financial Management**

Incorporate and measure Alternative Fee Arrangements (AFAs), budgets, accruals, and matter forecasts with secure, online access to collaborate with outside vendors.

- **Full Reporting and Analytics**

Broad, drop-down set of pre-built reports on all matter metrics with real time data. Online searching, job scheduling, and report building tool, to capture data in any field. Enhanced Analytics and Benchmarking included providing the optimal results needed to make informed data-driven decisions.

- **Legal Hold Module**

Embedded legal hold module to manage and track all custodians and status of holds. Customize communication templates and custodian questionnaires with full reporting, alerts, and reminders.

- **Document Repository & Management**

Comprehensive document repository with fully managed version tracking, check in/check out, and alerts for document review. Contract templates, on-line searching of metadata and text, and full reporting on all indexed files.

- **Matter/Legal Project Management**

Achieve the best outcome by tracking all matter data in one collaborative platform to effectively manage all teams, vendors, financial data, tasks, appointments, and calendars.

- **Configuration and Support**

A user-friendly UI enhances the user experience without the need for programming. Configurable and adaptable analytic dashboards, user-configurable pages, and personalized views set by user preference ensure the right information is available at any time. All functions are fully supported by our own dedicated team of ELM service experts.

*"The capability to make daily tasks easier to manage made all the difference when choosing our solution."*
