

Ascent ELM

Legal Ops Software:
Enterprise Legal Management Capabilities

Ascent ELM¹ provides a powerful, feature-rich, and secure repository for all legal notes, documents, and status updates related to your matters. A completely collaborative and integrated ELM solution simplifies the way you work with streamlined functionality that enables Legal teams to easily navigate within any specific matter data and task.

One solution provides superior control over cases and costs to drive success

Workflow Automation

Enhanced workflows provide matter intake, vendor onboarding, accruals, budgeting, and timekeeper submissions/review processing tools. Automation gives legal teams the ability to constantly evaluate and adjust their processes to remove review bottlenecks, improve efficiencies, forecast new matter tasks, and adapt to ever-changing requirements.

Advanced eBilling

Electronic invoicing allows vendors to submit with preset routing routines for large invoice volumes. An advanced rules processing engine provides error identifications, warnings, adjustments, and rejection capabilities. Ascent ELMTM enables complex searches, calculations, validations, and notifications at no charge. Most business system interfaces are included.

Financial Management

Incorporate and measure Alternative Fee Arrangements (AFAs), budgets, accruals, and matter forecasts with secure, online access to collaborate with all outside vendors associated with a matter.

Comprehensive Reporting and Analytics

Report BuilderTM offers a broad, drop-down set of pre-built reports on all matter metrics and data. Online searching, job scheduling, and report-building tools allow reporting on any matter data field. SmartViewTM delivers all enhanced Analytics and Benchmarking data in one place. Real-time, analyzed data provides the insights to make better business decisions.

Legal Hold Module

An embedded legal hold module manages and tracks all custodians and status of a legal hold. Custom communication templates and custodian questionnaires that fit your business are provided with full reporting, alerts, and reminders.

Integrated Outlook Integration

Handle your ELM tasks directly from your email inbox without sacrificing the features, functionality, and security. Ascent ELM SmartLink connects you to the tool you use most—email—but also has the power to easily add documents, create and edit matters, and manage invoices from within the Microsoft Office suite of tools including Word, Excel, and PowerPoint to further streamline work.

Matter/Legal Project Management

Drive successful outcomes by tracking all matter data in one collaborative platform with a user-defined and configured analytic dashboard, SmartViewTM. Ascent ELMTM makes it easy to display all teams, vendors, financial data, tasks, appointments, and calendars on one screen.

Configuration and Support

A user-friendly UI enhances the user experience without the need for costly programming. Configurable and adaptable analytic dashboards make each role more efficient. User-configurable pages and personalized displays put the information you need at your fingertips. Dashboards are set up by users to fit their roles and to deliver the right information at any time. All functions are fully supported by our own dedicated team of Enterprise Legal Management service experts.
