

Advanced information management tools and elevated support give you anytime, anywhere control of cases and costs to help inform decision making and drive successful outcomes.

# eDISCOVERY MANAGED SERVICES PLUS™

## Full Litigation Services & Support with Data Hosting

### Single Pane of Glass

Provides all case data including forensic data collection, culling, EDD processing, hosted doc review, and production all in a single, shared platform for the entire litigation team

### Collaborative Work

Simple, effective, and informative communication of your entire eDiscovery process

### Proven Process

A proven, seamless process that works the way you need and want it to. Advanced tools set you up for success every time

doeLEGAL is uniquely positioned to host and manage your entire eDiscovery from File to Trial. Your own team's capabilities are enhanced with added experience and technology to apply to all aspects of your litigation. Services include consulting, data mapping, early data assessment, data hosting, culling/ EDD processing, database setup, and production work. Your data is secure and accessible whenever you need it. doeLEGAL configures the entire EDRM process to work within your existing business model. Experienced eDiscovery experts are on staff to support and help you drive successful outcomes.

You want a technology solutions provider that will manage the technology as well as your data requirements so your team can focus on the case. Other businesses have used our services to overcome major litigation challenges by making certain their matter is supported by a dedicated team of experts to support your own in-house staff.

Our goal is to manage the technology while you manage the business of practicing law and winning your case.
