

doeDiscovery™ Capabilities

Trusted eDiscovery Expertise & Technology

For 22+ years, doeLEGAL has helped clients tackle their most complex eDiscovery projects. To accomplish this, we provide secure, online access to the most advanced eDiscovery technology, hosted on doeLEGAL's private, onsite ANSI/TIA-942 Tier 3 datacenter and supported by knowledgeable experts with extensive eDiscovery project experience.

When a law firm or corporate legal office needs a partner, doeLEGAL acts as their eDiscovery experts working like a virtual member of the client's litigation team. As project participants, doeLEGAL's specialists assist with defining project plans and implementing practices that:

- Minimize Review Burden
- Improve Processing Efficiency
- Increase Culling Accuracy
- Control and Reduce Costs

doeLEGAL's experts handle the application configuration and system administration tasks as a part of eDiscovery projects, so your litigation team can focus on reviewing documents, developing case strategies, and protecting clients' best interests.

Comprehensive eDiscovery Services and Support

EDD PROCESSING

Processing can do more to reduce the review burden than any other step in the eDiscovery lifecycle, but it must be done correctly in order to ensure project success. During processing, doeLEGAL's eDiscovery specialists will:

- Ingest, normalize and index "raw" data
- De-NIST data and remove non-user system files
- Extract metadata and text
- Perform OCR, create images, generate load files, etc.
- Cull documents with specific search terms, date filters, file types, etc.
- De-duplicate documents on global or custodian levels
- Generate term hit reports based on search criteria

HOSTED REVIEW

doeLEGAL's on-site, Tier3 datacenter allows the company to host client eDiscovery data in a secure, online environment from processing through production. Clients receive an inclusive, fully-supported review position that provides:

- Secure review environment
- Comprehensive support on the review process
- No 3rd parties for hosting services
- Reduced costs and minimized risks

EARLY CASE ASSESSMENT

After Processing, Early Case Assessment (ECA) is the most effective way to reduce the review burden and focus on the most relevant, litigation-related content. That is why doeLEGAL provides support for all ECA operations, including:

- Creation, configuration, and population of ECA databases
- Development of ECA strategies
- Assistance with prioritization of review (identification of high priority, low priority, and irrelevant docs)
- Promotion of relevant documents to the review database

ANALYTICS & REPORTING

Analytics and reports can be the difference between a failed project and one that is completed accurately, efficiently, and on time. doeLEGAL provides these resources with all hosted eDiscovery projects, at no charge:

- Advanced/complex queries and visual searching
- Email threading and document timelines
- Document families with parent-child relationships
- Document histories and audit trails
- Near-duplicate document detection and comparison

Comprehensive eDiscovery Services and Support

CREATION of PRODUCTIONS

Clients that partner with doeLEGAL can rely on the company's expert eDiscovery team to create litigation productions, which include:

- Formatting productions according to client specifications
- Adding pages numbers, bates labels, date/time stamps, burn redactions
- Creating images and/or image place-holders
- Generating load files, QC productions sets, and coordinate delivery of productions

TRAINING and ASSISTANCE

doeLEGAL's eDiscovery specialists provide comprehensive training for end users and application administrators. Experts are available to provide:

- End user and technical support
- Advanced training
- No fees during normal business hours
- 24/7 after-hours escalation support

"doeLEGAL has the capacity to provide the same sophisticated document analysis tools as their competitors. That's not why we insist on using them. We insist on using doeLEGAL because of their people. From the simplicity of pricing provided upfront by their sales team to the experience and near immediate responsiveness of their project managers, they really are the best in the business. We know they will always deliver." - Derek Kammerlocher, Litigation Attorney, Macdonald Devin, P.C.

Clients leave the technology to us

Help your litigation team ensure faster processing and more accurate results. Simplify complex data and provide relevant insights when and where they have the greatest impact. doeLEGAL handles the technology and processing to increase efficiency while reducing litigation costs. Leaving your team to practice law.
