doeDiscovery
Managed Services Plus™
Full Litigation Services & Support with Data Hosting

doeLEGAL is uniquely positioned to host and manage your entire eDiscovery from File to Trial. Your own team's capabilities are enhanced with added experience and technology to apply to all aspects of your litigation. Services include consulting, data mapping, early data assessment, data hosting, culling, EDD processing, database setup, and production work. Your data is secure an accessible whenever you need it. doeDISCOVERY™ configures the entire EDRM process to work within your existing litigation case model. doeLEGAL's experienced eDiscovery experts are on staff to support and help you drive successful outcomes.

You want a technology solutions provider that will manage the advanced technology along with your litigation data requirements, so your team remains focused on practicing law. Other law firms and corporate legal departments have used our services to overcome major litigation challenges by ensuring their matter is fully supported by a team of experts to support your own in-house staff.

Our goal is to manage the technology while you manage the business of practicing law and winning your case.

Single Source of Data
Provides all case data including forensic data collection, culling, EDD processing, hosted doc review, and production on accurate, secure dashboards providing insights delivered when and where teams need them.

Collaborative Workflow
Ensure simple, effective, and informative communication of your comprehensive eDiscovery process to remain informed.

Trusted Expertise
A proven, seamless process, managed by litigation service experts at each EDRM stage, using best-in-class technology that set you up for success every time. We work as an extension of your in-house team.
